

Ensuring our Fleet is Clean and Rental Ready

As the coronavirus (COVID-19) pandemic continues, Star Rentals top priority is the safety of our employees and yours. As part of this, below is an overview of the steps we are taking to ensure our fleet is sanitary and ready for your use.

Branch Locations

Prior to equipment being rented, our employees conduct a variety of safety and mechanical checks to assure the equipment functions correctly and safely. In addition to these routine checks, we now disinfect the equipment. We use U.S. EPA-approved disinfectants and follow manufacturers' instructions on their application to commonly touched surfaces necessary to operate tools and equipment. In particular, we focus on things like controls, buttons, latches, knobs, grab handles, operator seats, seat belts and buckles.

Customer Location & Jobsites

If the equipment is being delivered to you, our drivers will now perform a "final step" of precautionary disinfecting of the equipment. They will use an EPA-approved disinfectant and will spray or wipe the surfaces touched by the driver when delivering the equipment.

We have implemented thorough orientation of our employees on disinfecting equipment, practicing good personal hygiene and social distancing, and the proper disposal of wipes, towels and any other personal protection equipment they use in connection with delivering the equipment.

For any specific questions please reach out to any of our 18 branch locations through the CONTACT TAB on our website www.starrentals.com. We will be pleased to respond in a timely fashion or simply call your local branch.
